@linkedin.com/in/vivekgaindhar @codolio.com/profile/vivek_gurjar

SKILLS

- **Languages**: C++, JavaScript, Typescript, Python
- **Markup & styling**: HTML, Tailwind-CSS
- **Full-Stack Development**: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js
- **Databases**: PostgreSQL
- **Tools**: Git, Vercel, Firebase, Postman
- **DSA & Problem solving**: Strong Grasp of Data Structures and algorithms
- **AI**: Pinecone(vector DB), LLMs, LangChain, LangGraph

EDUCATION

- B.Tech - [CSE-AIML] | Lakshmi Narain College of Technology Bhopal *CGPA: 8.35 | Expected: 2027*
- XII (CBSE) | MGM Higher Secondary School, Itarsi, Madhya Pradesh *83.2%| 2023*

EXPERIENCE

- **Full-Stack Developer Intern | SyncAndExplore (Startup)** (Oct 13, 2025 – Nov 15, 2025)
  - Built backend APIs using Node.js & Express and handled API integrations.
  - Integrated payment gateways for secure transactions.
  - Worked with MongoDB for database design and queries.
  - Contributed to full-stack development, debugging, and deployment tasks.

  Tech Stack: Node.js, Express, MongoDB, Payment Gateways, API Integration, Git
  Certificate, LOR

ACADEMIC PROJECTS

- **Frontend-Ai-Agent** – Generate production ready frontend codebase
  An agentic LangGraph pipeline that generates production-ready React/Next.js frontend code from a plain English prompt. You describe a UI. The agent plans it, generates each component in parallel, and assembles a complete, runnable codebase, with Framer Motion animations and Tailwind styling baked in.

  Live App: live-app GitHub: github-repo

- **Vynk** - Real-Time AI Thought Matching Platform
  Developed a platform where users share thoughts anonymously and get matched instantly with same wavelength users through semantic similarity using vector embedding, Enabled real-time chat. Tech Stack: Next.js, Typescript, postgreSQL, Jina AI API.

  Live App: vynk-app| GitHub: github repo

ACHIEVEMENTS

- Developed **Orion's** **RAG-augmented memory layer**, implementing **scalable architecture** for efficient context-aware reasoning in a proactive AI companion. built on LangGraph architecture.
- Solved **600+ DSA problems**.
